HIGH THREAT

Recent piracy attacks in the Gulf of Aden have served to highlight the increasing threats facing the world's commercial fleet. Transits in such high risk zones demand a comprehensive security provision to safeguard vessels, their crews and cargoes.

Serving the maritime community since 1987, Securewest International has established an enviable reputation as a global provider of professional security services to commercial, military, cruise and offshore shipping and private yachts worldwide.

Securewest International offers clients worldwide a complete maritime security service provision that includes maritime security guards, approved Ship Security Alert System tracking and monitoring, Crisis Management Training and security planning and consultancy.

SECURITY OFFICERS

Uniformed Maritime Security Officers can be deployed to provide a knowledgeable and highly visible maritime security service, serving as an active deterrent to protect both the vessel and crew.

Securewest International's maritime personnel are recruited from the United States and United Kingdom armed forces, including the Brigade of Gurkhas and have a wealth of experience in the deployment and use of weapons - both lethal and non-lethal. Once on board, teams provide an evaluation of procedural and physical security measures which are implemented in accordance with the ship security plan.

MARITIME ASSISTANCE CENTER (24/7/365)
Priority email: alert@securewest.com
General advice email: mac@securewest.com

The team leader will liaise with the Captain advising on all likely scenarios and actions to be taken in the event of a security incident.

Security is a whole ship activity and briefings, training and anti-piracy drills can help to reassure and instill confidence in the crew.

MARITIME ASSISTANCE CENTER (MAC)

The Maritime Assistance Center is unique to Securewest International and can provide immediate assistance in a security emergency. The MAC is a manned, 24/7/365 operation centre from which satellite tracking, alarm monitoring and reporting, threat assessment and emergency liaison is available to all members.

Based on information from a multitude of sources - as well as intelligence from our own teams operating worldwide - the MAC can provide comprehensive port and route threat assessments as well as e-mail security alerts.

CRISIS MANAGEMENT TRAINING

With more and more vessels being hijacked and crews held for ransom, Securewest International can provide Crisis Management Training for key personnel.

With the growing emphasis on corporate responsibility and the increasing insurance liabilities facing fleets, training crew members, management teams and corporate owners to have the capability to provide in-house first response to hostage and kidnap situations can provide essential first tier intelligence to aid in negotiations for the release of persons or assets.

ESCORT VESSELS

Securewest International can provide fully manned security escort vessels for the protection of commercial shipping whilst transiting through High Risk areas. Escort vessels can be provided with either armed or unarmed security teams onboard.

Escort Vessels can provide:

- The ability to intercept and determine the intent of incoming craft before they become a potential threat, whilst providing early warning of benign threats such as fishing vessels and nets. This creates a cordon around the client vessel in which it can operate safe from the risk of attack
- A platform from which to launch fast intercept craft
- The capability for armed protection whilst keeping weapons off the client vessel

Securewest International specialises in security services, training and consultancy for the maritime industry. Since incorporation in 1987 the company has built a global reputation for excellence. Security services include manned guarding on board or in port, advice, consultancy and all Regulatory and Compliance services, including ISPS Assessments and Plans, crew and Security Officer training, for vessels and facilities around the world.
