

Risk Map 2023

Critical risk

The region is extremely volatile, with widespread conflict affecting businesses, visitors, and local populations. Lack of health facilities and/or environmental factors limit movement across the country.

High risk

The region is extremely volatile, with localized insurgencies/criminal gangs/ terrorist organizations. Poor health facilities and/or environmental factors could limit movement across the region.

Moderate risk

Political stability faces challenges from social and economic conditions that contribute to unrest. The government's capacity to deliver essential services is challenged. It is mostly safe to travel, but receiving specialized advice is recommended.

Low risk

The political system is mostly stable, with predictable governance structures. Low to moderate levels of crime. The area is deemed safe to travel to with no discernable threats to travelers.

Negligible risk

The political system is stable, with a high standard of governance, low corruption, and effective law enforcement. Environmental and travel hazards are limited. The area is deemed safe to travel to with no discernable threats to travelers.
